*We Encourage all US Importers and other eligible companies to join C-TPAT. For further information on C-TPAT please visit :
http://www.cbp.gov/xp/cgov/trade/cargo_security/ctpat/*

As a certified C-TPAT company, we are committed to educating all our customers on critical supply chain security issues

We recommend that you instruct your foreign vendors, freight forwarders and third party logistics providers to carefully secure the cargo shipping area and to establish secure shipping practices. We suggest the use of the following shipping procedures.

Restricted Access

Restrict access to the shipping area to authorized personnel only. If possible, fence off shipping area and issue color coded vests to all authorized employees.

Correct Documents

Prepare, verify and transmit all shipping documentation with complete and accurate information.

Transportation Company

Before shipping any merchandise from the facility, verify that cargo is being released to the specified carrier on the shipping order.

Pre-loading Verification

Stage all merchandise from inventory near the loading dock area for verification. Perform a carton count and pallet count to verify that the counts match the documentation.

Verify that cargo descriptions and cargo labeling match the shipping documentation.

In the event of any shortage, overage, or cargo damage, re-verify merchandise for any suspicious or unusual items and hold the merchandise pending further review and resolution.

Loading Verification

Inspect container and carefully load merchandise into the container.
